Laboratory Results

Date	Test	Result	Reference range	Comment
2026-09-18	TSH	3.1 mIU/L	0.4 - 4.0 mIU/L	Within range
2026-09-18	Vitamin D	24 ng/mL	30 - 100 ng/mL	Slightly low
2026-09-18	Hemoglobin	12.4 g/dL	12.0 - 15.5 g/dL	Normal
2026-03-10	TSH	4.6 mIU/L	0.4 - 4.0 mIU/L	Slightly high, dose adjusted

Usual Vitals

Resting heart rate: 76 bpm. Usual blood pressure: 122/78 mmHg. Usual SpO2: 97%. SpO2 may dip to 95 percent during asthma flare-ups.

Consultation History

Date	Doctor	Reason	Summary
2026-09-25	Dr. Vikram Menon	Thyroid and asthma review	TSH back in range. Asthma well controlled. Vitamin D supplement continued.
2026-06-14	Dr. Neha Kapoor (Orthopedics)	Knee pain	Mild to moderate osteoarthritis in both knees. Physiotherapy advised, no surgery needed.

Upcoming Appointments

Date	Time	Doctor	Reason	Location
2026-11-12	11:00	Dr. Vikram Menon	Routine follow-up	Sunrise Clinic, Room 2
2026-12-03	16:30	Dr. Neha Kapoor (Orthopedics)	Knee physiotherapy review	Sunrise Clinic, Room 5

Care Instructions

• Take levothyroxine 30 to 60 minutes before breakfast and do not take calcium within 4 hours of it.

• Rinse the mouth after every steroid inhaler use.

• Avoid dust and strong smells; keep the salbutamol inhaler within reach at all times.

• Do 20 minutes of gentle walking and knee exercises daily.

Doctor's Notes

2026-09-25: Recheck TSH in 6 months. Reassess vitamin D after 3 months of supplements.

2026-06-14: Avoid stairs and squatting where possible. Weight reduction of 3 to 4 kg would help the knees.
