Patient Details

Name: Mohammed Imran **Age:** 72 **Sex:** Male **Blood group:** O+
Height: 170 cm **Weight:** 78 kg **Languages:** English, Urdu, Kannada
Primary doctor: Dr. Farah Siddiqui (Cardiology)
Emergency contact: Salma Imran (Wife), +91 99020 44556

Allergies

Substance	Reaction	Severity
Aspirin	Stomach bleeding	Severe
Iodine contrast dye	Hives	Moderate

Medical Conditions

Condition	Since	Status
Coronary Artery Disease (stent placed 2022)	2022	Stable
Atrial Fibrillation	2023	Rate controlled, on blood thinner
Benign Prostatic Hyperplasia	2019	Managed with medication

Past Surgeries

Procedure	Date	Hospital	Notes
Coronary angioplasty with stent	2022-08-03	Heartcare Institute	One drug-eluting stent in the LAD artery.
Cataract surgery (right eye)	2021-02-20	Vision Care Centre	Good visual recovery.

Current Medications

Medicine	Dose	How often	Purpose
Warfarin	3 mg	Once daily, evening	Blood thinner for atrial fibrillation
Metoprolol	50 mg	Twice daily, morning and evening	Heart rate and blood pressure
Rosuvastatin	10 mg	Once daily, at bedtime	Cholesterol
Tamsulosin	0.4 mg	Once daily, after dinner	Prostate symptoms
Pantoprazole	40 mg	Once daily, before breakfast	Stomach protection

Laboratory Results

Date	Test	Result	Reference range	Comment
2026-10-05	INR	2.4	2.0 - 3.0 (target)	In target range
2026-10-05	LDL Cholesterol	68 mg/dL	below 70 mg/dL	At goal
2026-10-05	Creatinine	1.1 mg/dL	0.7 - 1.3 mg/dL	Normal
2026-07-08	INR	3.4	2.0 - 3.0 (target)	Slightly high, warfarin dose reduced

Usual Vitals

Resting heart rate: 70 bpm. Usual blood pressure: 128/80 mmHg. Usual SpO2: 96%. Pulse may feel irregular because of atrial fibrillation.

Consultation History

Date	Doctor	Reason	Summary
2026-10-06	Dr. Farah Siddiqui	Cardiology follow-up	INR and cholesterol at goal. No chest pain. Continue all medicines.
2026-04-22	Dr. Anand Rao (Urology)	Urinary frequency	Prostate mildly enlarged. Tamsulosin continued.

Upcoming Appointments

Date	Time	Doctor	Reason	Location
2026-11-09	09:30	Dr. Farah Siddiqui	INR check and heart review	Heartcare Institute, OPD 3
2027-01-14	10:15	Dr. Anand Rao (Urology)	Prostate review	City General Hospital, OPD

Care Instructions

- Take warfarin at the same time every evening and never skip or double a dose.
- Do not take aspirin, ibuprofen or other NSAID painkillers. Ask the doctor first before any new medicine.
- Keep green leafy vegetable intake steady from day to day because it affects warfarin.
- Go to emergency care for chest pain, black stools, or any bleeding that does not stop.

Doctor's Notes

2026-10-06: INR every 4 weeks. Continue low-salt diet and daily 30 minute walk.

2026-04-22: Avoid decongestant cold medicines because they can worsen urinary symptoms.
